

SEA MACHINES PRODUCT COMPARISON

SM300 VS. SM200

Introducing the Sea Machines SM series of intelligent industrial-grade autonomous and remote-control systems, ready for installation aboard most types of commercial and government workboats. The company's products are proven to improve the operational performance and safety of workboats, while reducing operator costs.

SM300

Ideal for: Survey, spill response, dredging, security/ISR and offshore construction support

SM200

Ideal for: Fireboats, utility tugs, spill-response vessels and other workboat operations

Features

Remote helm control (thrust and steering)	✓	✓
Intuitive graphical chart interface	✓	
TALOS autonomous mission command	✓	
Collaborative vessel autonomy	✓	✓
Survey line and area grid autonomy	✓	
Dynamic obstacle avoidance (AIS and radar)	✓	
Remote payload control (winches, pumps, etc.)	✓	✓
Available for retrofit or new-build workboats	✓	✓

Doubles productivity

Reduces operator costs
